

Problem:

I am frustrated with **response time** and I am always dealing with **reoccurring problems**. My business needs to be **running reliably**. Downtime is costing me money. What do I do?

Solution:

Proactive Management is the key here. ESW strongly believes that once there is a standard environment in place --- **proactive monitoring and preventive maintenance** becomes a key service for all our customers. As a key solution, **SafetyNET** is a suite of services allowing us to offer our customers the reliability and responsiveness, which fortune 500 companies have come to expect — at a reasonable cost.

Managing your I.T. environment is the key to avoiding reactive cost and lost productivity. This area of services offers customers the highest level of value when implemented with an overall Strategic vision.
