

Problem:

I get hundreds of junk emails. What can I do?

Solution:

***** 10 out of 12 emails are Spam *****

Safety**NET** - SpamTrap will reduce these annoying and unsolicited email messages.

SpamTrap uses an advanced probing and scoring engine that captures up to 99% of all spam. Legitimate email messages pass through to the recipient, while spam is quarantined in a web-based, password-protected Message Center. Filters can be adjusted to your personal preferences.

With the **flexible policy framework** users can quickly and easily configure different rules for inbound and outbound messages.

Feature Highlights:

- Stops over 98% of spam
- Increased productivity
- Fully automated
- Reduce risk of infection (virus or spyware)
- Proper email delivery without latency
- Quick and easy to configure rules for messages

Pricing:

Starting at \$3.50 / mailbox / month

** Other variations are available. Contact us for more details*
