ESW Continues to grow its presence in Alberta Healthcare

<Calgary> Further Growth in Health Care Sector. Over the past several years, ESW has been instrumental in consulting and delivering technical solutions to physician offices throughout Alberta. ESW has historically been supporting individual clinics but as the healthcare climate in Alberta continues to evolve, the government has established programs like the Primary Care Initiative to help improve health care at the family practice level. Since 2007, ESW began working with the newly formed primary care networks like South Calgary Primary Care Network (SCPCN) and Calgary Foothills Primary Care Network (CFPCN). It is with great pleasure that we welcome the Mosaic Primary Care Network to our family at ESW. "Improving health care in Canada is near and dear to my heart. These organizations are going to make a difference to my family today and for many years to come. Healthcare is a great Canadian value." – Andrew Leung (ESW Partner)
